

ALTERNATIVE OPTIONS FOR CANINES:

INFOGRAPHIC

A great breakdown of how to secure your dog in a vehicle based on your canine's personality. The source is an online article from The Bark called, 7 Ways to Secure Your Dog in the Car.

thebark.com/content/7-ways-secure-your-dog-car

1 FIT A DOG HARNESS SEAT BELT¹

Perfect for well-behaved dogs, the harness secures your dog in one position with a strap that plugs into the seat belt.

MAKE SURE:
Your dog doesn't chew through the harness mid journey.

SUITABLE FOR:
Large Small

HOW TO FIT

- 1 Slide the car seat belt through the dog seat belt loop and buckle the dog seat in.
- 2 Place your dog on the car seat and connect the silver clasp to your dog's harness.
- 3 Adjust your dog's seat belt so it's secure and comfy.

6 PROVIDE A BACK SEAT HAMMOCK¹

Perfect for older dogs who may want a lie-down, the hammock protects them from falling off the seat and stops them climbing into the front.

MAKE SURE:
You get one with a non-slip covering so the hammock doesn't slide off the seat.⁴

SUITABLE FOR:
Large Small

HOW TO FIT

- 1 Lay the quilted side onto the back seat and insert the anchors between the back and base of the seat.
- 2 Attach the fasteners to the rear and front headrests.

5 FIT A DOG GUARD IN THE BOOT¹

Ideal for the canine traveller who likes to see you and move around, the guard prevents your dog from being thrown forward in an accident.

MAKE SURE:
You get a guard that bolts to the floor and roof of your car, so it can't be knocked out of position.

SUITABLE FOR:
Large Small

HOW TO FIT

- 1 Find a dog guard that will fit your car.
- 2 Bolt the guard onto the back of the rear car seats.
- 3 Lock the guard to the inside of the roof (follow the instructions provided).

7 INSTALL A BACK-SEAT BARRIER¹

Well suited to larger dogs that struggle to relax when restrained, the barrier keeps your dog on the back seat should you brake suddenly.

MAKE SURE:
The barrier is securely attached before setting off.

SUITABLE FOR:
Large ~~Small~~

HOW TO FIT

- 1 Remove the car headrests.
- 2 Slide the headrest posts through the D-rings and reattach the headrests.
- 3 Attach the bottom corners of the barrier to the seat using the hooks or clips provided.
